Portfolio: cheenu-portfolio-omega.vercel.app | GitHub: github.com/cheenu-exe/cheenu-portfolio

PROFESSIONAL SUMMARY

Computer Science and Business Systems undergraduate at Karpagam Academy of Higher Education with a CGPA of 8.26/10. Focused on full-stack development and cybersecurity, with hands-on personal project work involving Flask-based web applications, vulnerability-scanning workflows, AI-output bias analysis, and a cryptographic-readiness platform concept. Familiar with HTML, CSS, Python-based web frameworks, API integration, SQL databases, Git, Linux, and security reconnaissance tools. Interested in building practical web applications and learning secure software development through controlled lab environments.

TECHNICAL SKILLS

Programming & Data: Python, JavaScript fundamentals, SQL, C++

Web Development: HTML, CSS, Flask, FastAPI, REST API integration, Google Gemini API

Databases & Tools: SQLite, MySQL fundamentals, Git, GitHub, Vercel, Docker, Linux, VS Code

Cybersecurity & Networking: Nmap, WhatWeb, Gobuster, FFUF; reconnaissance, HTTP/HTTPS, DNS and networking fundamentals

PROJECTS

ECDAT — Enterprise Cryptographic Discovery and Analysis Tool

CONCEPT & WORKFLOW DESIGN

Designed the concept and workflows for a cryptographic-readiness platform featuring an interactive command center, cryptographic asset inventory, remediation workflows, migration simulation, post-quantum cryptography (PQC) recommendations, and an AI-assisted interface. Portfolio lists a React, TypeScript, Vite, Tailwind CSS, Node.js, Express, tRPC and MySQL-based stack.

Forge IDE — AI-Assisted Coding Workspace

AI-ASSISTED

Worked on a coding-workspace concept using a Next.js frontend with Monaco Editor and a FastAPI backend for code execution. Planned Docker-based execution, runtime detection, configurable limits, and sandboxing. Technologies shown in the portfolio include Next.js, React, TypeScript, Monaco Editor, Tailwind CSS, FastAPI, Python, Docker and PostgreSQL.

Vulnerability Scanner Dashboard

SELF-DEVELOPED · IN PROGRESS

Developed a web-based dashboard concept for automated reconnaissance and vulnerability scanning using Nmap and related tools. Portfolio describes a Flask application with SQLite result storage and automated reconnaissance workflows.

AI Bias Detector

AI-ASSISTED PROTOTYPE

Built a prototype concept for analyzing AI-generated outputs for potential bias, using an output-analysis pipeline, bias-detection logic, pattern recognition and reporting. The portfolio lists Python and AI as its primary technology areas.

Sentinel — Cybersecurity Lab Practice

HANDS-ON PROJECT

Built a personal security-practice environment using Debian, Docker, vulnerable web applications and Nginx. Practised reconnaissance, web-application testing and network troubleshooting in a controlled lab, and explored Wazuh monitoring, log collection and security-event analysis.

EXPERIENCE & ACTIVITIES

Independent Technical Work | Personal Development & Software Projects

Built and tested application features, debugged issues, and refined functionality across personal software projects. Explored web development and AI-assisted prototyping while developing practical programming and troubleshooting skills.

Cybersecurity Lab Practice | Personal Security Lab

Configured a hands-on lab with isolated systems and vulnerable applications; practised reconnaissance, web-application testing and network troubleshooting, and explored security monitoring and log analysis.

Hackathons & Collaborative Problem-Solving | Participant

Participated in team-based hackathon work focused on cybersecurity, cryptography and technology-driven problem-solving. Collaborated on project concepts, technical discussions, solution planning and presentations under time constraints.

EDUCATION

B.Tech, Computer Science and Business Systems (CSBS) — Karpagam Academy of Higher Education (KAHE), Coimbatore
Expected Graduation: 2029 | CGPA: 8.26/10

FOCUS AREAS

Full-Stack Web Development • Cybersecurity • Web Application Security • Network Reconnaissance • Post-Quantum Cryptography
